-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 , 10-17 and 19-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Richard et al. (5,812,818).

As to claims 1 and 4, Richard teaches a method for checking the translation accuracy of a translator, comprising the steps of:

Translating a source natural language text to a target natural language and translating the target language back into the source language for the purpose of checking the accuracy of the translation, and inherently identifying the quality (Col.64, lines 1-5).

Richard doesn't explicitly teach where the back and forth translation is iterated/repeated. However, Official Notice is taken that iterating a process number of times is a common practice and would have been obvious to one of ordinary skill in the art to introduce in Richard's teaching for the purpose of getting a more accurate assessment of the system.

As to claims 2-3, Richard teaches wherein the translation machine is a computer comprising hardware and software (Figs. 1 and 13).

As to claims 5-8, Richard teaches where the accuracy of the system is checked by inherently comparing the original source language with the translated source language for its "equivalence".

Claims 10-17 and 19-20 are analogous to claims 1-8 and are rejected for the foregoing reasons by Richard.

***Allowable Subject Matter***

Claims 9 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
